

## **New Website Introduction**

A new website has been created for the **Grey Oaks Irrigation Services**.

The web address is [GOISNaples.com](http://GOISNaples.com).

The purpose of the website is to post and record all communication relating to the Grey Oaks Irrigation Services. Information on the new site will change as made available from management.

An email blast system will be used, as part of the website, to inform owners of activities and items of importance. A copy of each email blast sent will be posted on the Communications section for reference.

On the new site are 2 active forms.

One will allow you to **"Sign up email blasts"**, if for some reason you are not receiving the notifications you can always find a copy on the new site, plus use this form to ensure you email address will be included.

The other form will allow you to **"Send a Message to the Manager"**. This form will create a record of communication from the owners to management.

Links to both forms can be found on the HOME page of the new site.

We trust you will find this new site of value as it is the next step in improving communications within our community.

Thank you,

KEB Management
